

Renovo V5.1.1 Adjuster Release Notes

- **Adjuster Profile Changes**
 - The ability to edit addresses has been removed due to data discrepancy errors. You may contact your manager or the Resource Team to confirm and update any changes of address.
- **Increased Deployment Efficiency**
 - We have updated the process to provide adjusters with Crawford emails. There is no change to the adjuster's process, but you will notice a decreased time between being added to an assignment and receiving your Crawford credentials.
- **Commission – Compensation After Assignment**
 - An issue was resolved that was causing delays in the compensation for commission-based adjusters where billing was entered post-assignment. A grace period has been added and this commission will now be picked up. Compensation is still done on a weekly basis – work needs to be input before Friday to be calculated in payroll.
