

# Crawford & Company (Nederland) B.V.

Marine & Transportation

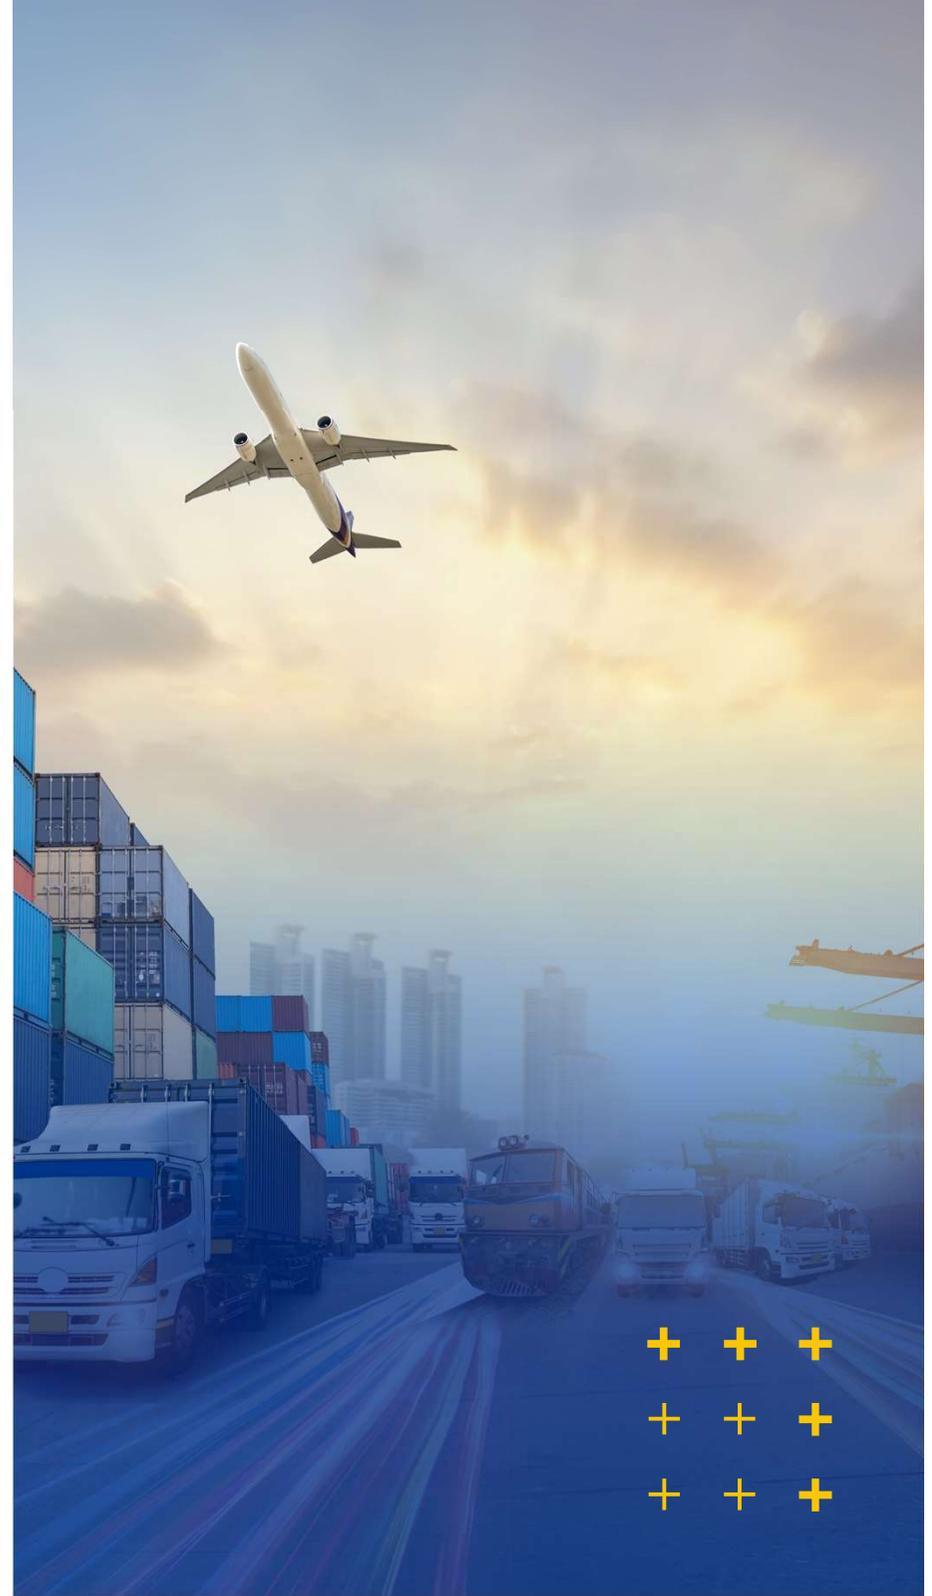

# Marine & Transportation

Our Marine & Transportation team is highly diverse in composition but has been a well-known and reliable player in the Dutch market for many years. The team handles all conceivable types of damage that may occur during transport and storage. This includes both damage to goods (cargo and logistical liability) and damage to the means of transport itself (hull and technical aspects).

Key focus areas of this team are:

- General cargo damage (including temperature-sensitive goods such as meat, fish, fruit and dairy, as well as dry and liquid bulk cargo, machinery and electronics);
- Logistics and carrier liability;
- Nautical investigations/technical maritime damages/pleasure craft;
- Land and work equipment damages.

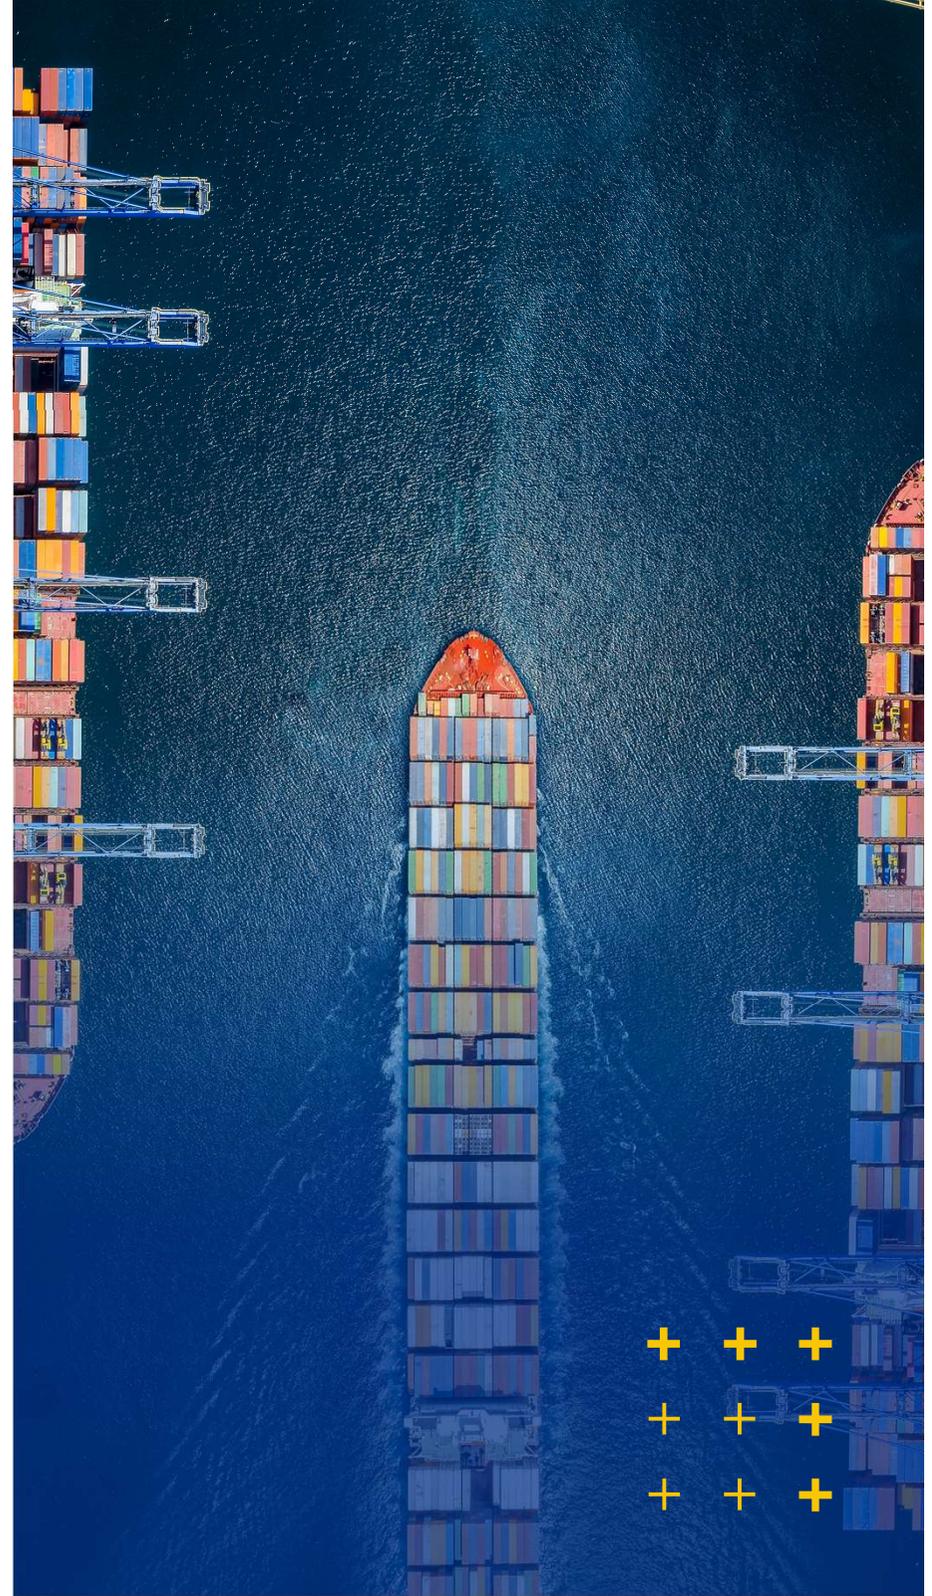

# Marine & Transportation

The team handles approximately 1,000 claims per year and our loss adjusters are trained to investigate and determine the nature, extent and cause of each type of damage.

Additionally, they can assist your insured party in taking damage mitigation measures. If a claim may be recoverable from a responsible party, they will secure recovery opportunities in consultation with our specialized recovery department.

Our Marine & Transportation loss adjusters are part of our international network of specialists. No matter where in the world the damage occurs, we always have experienced and specialized loss adjusters available to ensure that the right loss adjuster is assigned to each case.
