

# Crawford & Company (Nederland) B.V.

Property

# Property

Our Property department represents a wide range of specializations. Our loss adjusters investigate the causes of damage and assess its consequences.

We are active in the private, corporate and public sectors, whilst having a sharp eye on protecting your interests and of the policyholders.

Our loss adjusters are trained to communicate effectively and are able to manage the expectations of stakeholders.

We are always readily available and strive for a swift resolution of assignments, even outside of regular office hours.

If a claim is potentially recoverable, we ensure that the recourse options are secured.

# Property

Our loss adjusters are diversely skilled and specialized, ensuring that the right loss adjuster can be assigned to the according type of damage. For cases requiring a multidisciplinary approach, we operate as a team combining the needed specialties.

Our structural engineering loss adjusters specialize in various fields, such as roofs and facades, concrete and steel structures, as well as monumental buildings.

Our technical engineering loss adjusters have extensive experience in machinery breakdowns, building services engineering (electrical and mechanical engineering), datacenters, (sustainable) energy & utilities, aviation technology and railway-technology.

Our general loss adjusters have extensive experience in largescale industries, SMEs and the private sector.

Additionally, Crawford specializes in the fields of fine art, antiques and valuables.
